

Dear Readers,

We wish to inform you that an article titled "Effect of Copper/Alumina Hybrid Reinforcement on the Microstructure and Mechanical Properties of Stir Cast Aluminum Alloy AA6063" has been removed from the Journal of Advanced Technologies and Materials (AT&M). The removal was initiated at the request of the author due to the identification of a conflict of interest that was not appropriately disclosed during the submission process.

We acknowledge the importance of maintaining ethical standards in academic publishing and have promptly addressed the author's request to remove the article from our online platform. Upholding transparency and integrity remains our priority, and therefore, we will provide an editorial note or clarification in the upcoming printed issue addressing this matter.

We appreciate your understanding and continued support for our dedication to maintaining the credibility and integrity of our journal.
